Manufacturer of demountable partitions

ABCD International has been designing and marketing demountable office partitions, phone booths and meeting boxes since 1980.

Their comprehensive range of products thus makes it possible to meet the aesthetic and regulatory technical requirements (CERFF, acoustic, fire rating...) of most architectural projects.

With 570 000 sqm sold each year, both in France and abroad, ABCD International has earned itself a reputation as a leader in office layout design.

Office partition fit-out

Created in 2000, SOBAC Cloisons offers supply and installation in the office partition fit-out projects. With more than 70.000 sqm of demountable partitions installed every year, SOBAC Cloisons :

- Provides commercial, technical and administrative assistance until the project completion.
- Defines the team dedicated to your project depending on the type of works and the project schedule.
- Benefits from ABCD International's stock capacity (more than 100.000 sqm of walls in permanent stock), buying department and responsiveness to respect production and delivery time of the projects.

From generation to generation, more than 40 years of passion

For more than 40 years, ABCD International has been designing, manufacturing and distributing more than 16 systems of demountable office partitions. More than 175 valid certificates (CERFF, acoustics, fire-rating, guardrail) attest to the quality of our products.

SOBAC Cloisons study every specification of your project, plan their actions and implement their solutions in accordance with standards and norms in force. SOBAC Cloisons advise you on the most appropriate material to achieve the desired acoustic performance and aesthetic, technical and financial requirements.

Besides, as an active member of the Building Industry, ABCD International has been focusing for the past 16 years on a sustainable development-oriented strategy. This commitment not only concerns the design and manufacturing of our partition systems, it also aims at changing our staff's way of thinking as far as environment is concerned.

We have been awarded a silver medal as our first RSE EcoVadis certification, to measure our company's ethical, environmental and social impact.

Our Deputy General Manager is currently President of the CERFF Association, the French Agency in charge of studies and research related to facades, windows and internal walls.
