

BIM OBJECTS FOR EVERYONE

ABCD International goes BIM !

Sustainability and continuous improvement being the Group's keywords, ABCD International has decided to adopt a digital transformation strategy, first by changing to a paper-free system, and now by offering a digital product catalog with a wide choice of quality BIM objects.

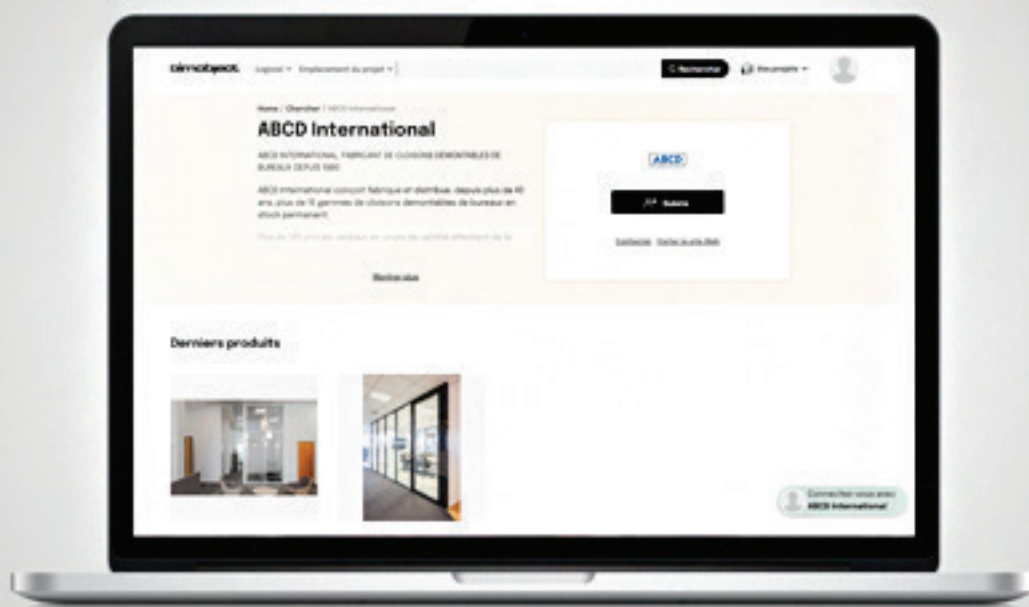

What is a BIM object?

BIM, short for Building Information Modelling, is a 3D digital construction process where information about each component is collected and managed by the project team throughout its life cycle.

With more than 2,000 construction product brands, BIMobject® is a global platform connecting manufacturers, architects and other users of BIM objects. It is therefore quite natural that ABCD International Group chose BIMobject® for the distribution of their BIM objects.
