

NEW ID1 DOORFRAME

We offer you a brand new doorframe to go with the modern design of our frameless single glass wall ID1.

The absence of structure supporting the doorframe gives it an aesthetical thinness and makes it really easy to install.

This doorframe can be used with standard or full-height glass doors for full transparency or wooden doors to highlight the doorway.

Doors can be mounted on adjustable and reversible hinges or pivots.

Available
mid-February 2016
