

Our office partitions  
**HAVE NEW ACOUSTIC TESTS  
 AT HAND**

Further to the new norm DTU 35-1 pertaining to demountable office partitions, laminate glass (55.2 and 66.2, standard or acoustic) can now be used in the ID2 system - framless double glass - as an alternative to toughened glass.

Therefore, ABCD has passed new acoustic tests, using different glass combination with outstanding results.

## SEE FOR YOURSELF !
