

SATINE METAL

Our range of products is expanding with our new office partition: the Satine Metal.

It is an aluminium demountable office partition with magnetic and painted steel-faced panels which can be installed in a gap-joint or edge-to-edge version, thus combining greatness and technics.

Thanks to its fire-rated panels, it is compliant with the standards for tower buildings and offers high acoustic performance.

Thickness of the partition: 77 mm or 103 mm

Maximum height of the partition: 3100 mm

Maximum width of the panels: 1132 mm

Finition of the panels: colour chart available

Acoustics – 77 mm version :

$R_w = 52 \text{ dB} / R_A = 47 \text{ dB}$ (Cert. n°BEB2.D.6005-8)

Acoustics – 103 mm version :

$R_w = 52 \text{ dB} / R_A = 50 \text{ dB}$ (Cert. n°BEB2.D.6005-3)
