

SATINE « EDGE-TO-EDGE »

A NEW NAME FOR LUXURY

You can now install full-height solid partitions, in an edge-to-edge style, using 12mm melamine panels, with special Satine edge. Perfect mounting, quick and easy to install, and at a very affordable price : you will meet all market's expectations.

You can combine different styles to get different effects : for example, using the « edge-to-edge » system on one side will give your partition real class, while the use of joint-covers will give a more classical effect.

HOW DOES IT WORK ?

With our new self-positionable clips, you do not need any tools to position and install panels onto the ABCD Satine system.
