

NEW SPACERS

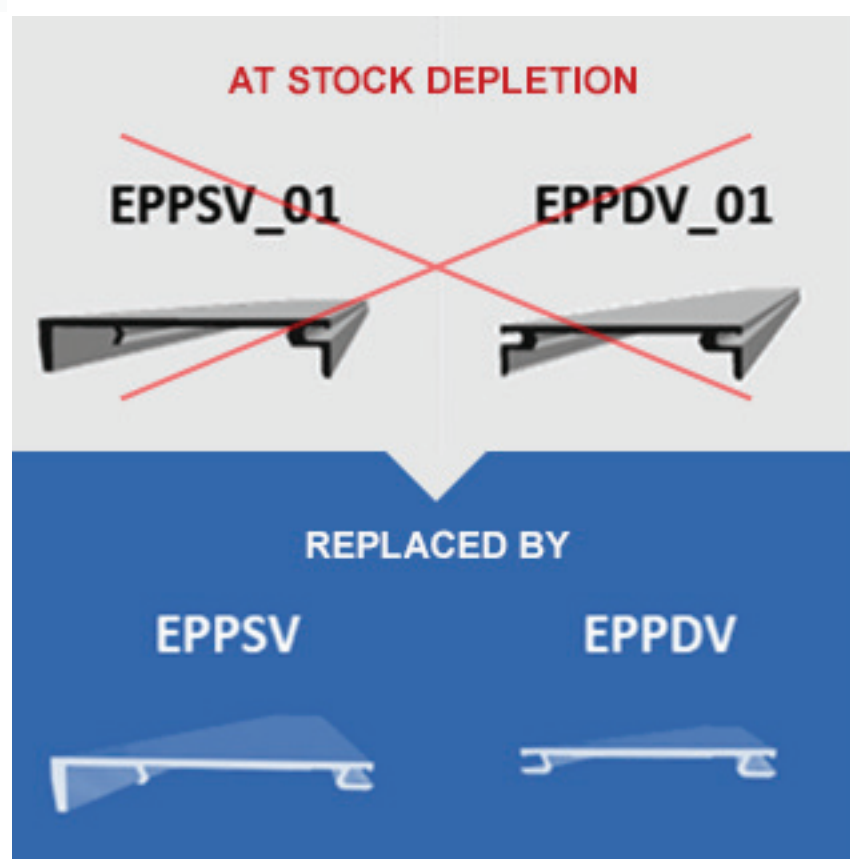

In a process of continuous improvement, we have modified our spacers for P26, P40 and P100 systems.

Improved clipping, ease of assembling / disassembling and durability are the main advantages of the new spacers.

They will replace the current spacers when the latter are discontinued.

The improvement of the spacers comes with a simplification of our glazing profiles : from now on, there will be only one aluminium glazing profile, whatever the glass thickness is (from 5 to 12mm) with matching glass seal. The "-01" profiles will be stopped when stock is cleared.

All our seals can be identified easily with a coloured thread, matching a specific glass thickness:

- Orange for 5mm glass
- Yellow for 6 to 7mm glass
- Red for 8 to 9mm glass
- Blue for 10 to 11mm glass
- Green for 12 to 12.8mm glass

Our sales team is at your disposal, do not hesitate to contact us.
